

Logo Format Guide

Quick Guide

With all the different file types in this package, please reference this small guide to understand each file type and when to use them.

- Ervin

SELAH

VECTOR FILES

.AI

Adobe Illustrator

AI is a proprietary vector-based file format by Adobe Systems. It is the standard source file for your logo. Some print shops will request this file when prepping a project for print.

.PDF

Portable Document Format

Another editable vector-based file format. Its universal file format makes it extremely versatile. It's typically used for printing and easily sharing documents online.

IMAGE FILES

.JPEG

Joint Photographic Experts Group

A popular image format that is commonly used for photographs and web graphics. Its lossy compression allows for smaller file sizes than PNG, but does not support transparent backgrounds.

.EPS

Encapsulated Post Script

Like a PDF, an EPS can be edited with any vector graphics program. Some print shops with older software will still request these files so they're good to have on hand.

.SVG

Scalable Vector Graphic

SVGs are great for websites or apps to keep logos and icons sharp and are infinitely scalable without pixelation.

.PNG

Portable Graphics Network

Another image file format that is great for web graphics and digital displays. Supporting transparent backgrounds is a key advantage over JPEG, but file sizes are typically larger.
